

# What happens when I join the step challenge late?

As the Company step challenge is an auto-submission challenge, you were already a part of the challenge, but your steps were not synced. We allow you to sync your fitness data for the past 7 days, which means your steps for the previous 7 days will be reflected on the leaderboard.

However, if you join after 7 days from the challenge start date, please note that the steps for the first few days of the challenge will not be counted in your total step count.
